Dear Sir/Madam,

I am Satrap Rathore,a third year student in the department of Computer Science and Engineering,NIT Durgapur.

I would like to apply for a summer internship position with Smartprix.I learned of your company via my classmates.I am proficient in all the courses taught in my academics and I would like to implement them in real life.Besides,I have undertaken 2 department projects involving implementing algorithms on machine learning..I feel that the academic environment suits me well and some research work as a part of your team would help me fully utilize my theoretical knowledge into practical application and also serve as a strong platform for my career.

I would be grateful if I could work under your guidance during the summer breakwhere in I would be able to put 6-8 weeks of my dedicated work and contribute my personal best in the process.I have attached a link to my resume with this mail.I would be glad if you could spare some time from your schedule for the evaluation of my credentials.

Yours sincerely,

Satrap Rathore
